PRIVA BUILDS ON PARTNER NETWORK WITH APPOINTMENT OF LEADING INTEGRATION SPECIALIST

One of the UK's leading suppliers of building control systems, Priva Building Intelligence Ltd, has appointed award-winning BG Controls Ltd to its Priva Partner Network. The Priva Partner Network encompasses a select group of installation firms, system integrators and controls contactors who are fully trained in the commissioning and engineering of Priva's suite of hardware and software solutions. BG Controls, which has offices in South Yorkshire, the North West, the Midlands and Belfast and employs 65 people, is the 41st company to achieve Priva Partner status.

Widely accepted by industry peers as one of the most innovative and fastest growing companies in the sector, BG Controls has been integrating the latest in building controls solutions since 1995. A recent winner of the title '*Independent Systems Installer of the Year*' at the Building Controls Industry Awards, BG Controls operates as an 'Open Systems House'. The company supports and operates a range of intelligent control solutions from a variety of manufacturers under the philosophy of 'the right solution for the right application'.

According to BG Controls Director John Nicholls, Priva's technology offers its Partner Network a number of advantages: "One of the most impressive aspects of Priva's TC Select software engineering tools is that it provides a much simplified programming environment in comparison with other similar technologies. This is good news for our customers because it has the potential to significantly reduce the engineering and programming time associated with a project – sometimes by as much as 50 per cent."

Anders Norén, managing director of Priva Building Intelligence Ltd says that his company is as committed as ever to the concept of the Partner Network: "We believe that it is through our Partner Network that our customers are able to tap into the best possible engineering expertise and technology solutions. We invest a great deal in our Partners in terms of training and technical support and we are very selective about bringing new companies into the Network. BG Controls is exactly the kind of specialist Priva wants to work with: it is a company which is well respected across the industry both by end-users and its peers. All of us at Priva are delighted to be able to bring such a significant player into our growing network". - ENDS
