### **BG Controls achieves Trend IQ Assured Partner accreditation**

Award-winning building controls specialist BG Controls has become a Trend approved service and maintenance company by achieving IQ Assured Partnership accreditation.

As an IQ Assured Accredited Partner, BG can offer a comprehensive range of services that make up the Trend IQ Assured support programme – from 24hour breakdown cover and remote fault diagnosis to system enhancements and upgrades.

The programme is designed to ensure that end users derive maximum benefit from their Trend Building Energy Management System, by receiving service and support from an approved Trend Partner.

“BG Controls is a welcome addition to our national network of IQ Assured Partners,” says Craig Needham, Trend’s Business Development Manager. “Already an authorised supplier of Trend systems, BG Controls was selected on the strength of its resources and systems knowledge.”

“We are delighted to have achieved this recognition,” adds Phil Bolus, Director of BG Systems Support Ltd. “The accreditation will provide added peace-of-mind for our customers who can be assured that they are receiving a consistently high standard of workmanship along with access to all the latest Trend products.”
