### **BG Controls celebrates success with second Delta award**

Within months of receiving a 'New Partner Performance' award, BG Controls is celebrating further success with an award for growth from the international building controls manufacturer, Delta Controls Inc.

The '2008 Number 1 Delta Growth – EMEA' award, was presented to BG Controls in recognition of achieving the largest percentage growth of all Delta partners in the EMEA (Europe, Middle East and Africa) region. The Rotherham-based company received the award at Delta's annual Global conference in Canada last month.

Canadian based, Delta Controls Inc. is a world leading developer and manufacturer of high quality native BACnet building automation systems.

BG Controls has enjoyed rapid growth since it became one of Delta's specialist UK partners only last year. Partners are responsible for the engineering, installation and maintenance of Delta systems and are carefully selected based on strict performance and service criteria.

"It's great to have all our hard work recognised," said Duncan Biggins, Managing Director of BG Controls. "Delta has also helped to aid our growth through the ongoing support it has offered us since we became a partner."

Kurt Graves, Delta's International Business Manager, adds: "The EMEA region has many deserving candidates but BG Controls won the award because of its outstanding performance over the past year."
